INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT

International application No. PCT/IT 03/00792

**I. Basis of the report**

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

**Description, Pages**

1-47 as originally filed

**Claims, Numbers**

1-12 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- the language of publication of the international application (under Rule 48.3(b)).
- the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- contained in the international application in written form.
- filed together with the international application in computer readable form.
- furnished subsequently to this Authority in written form.
- furnished subsequently to this Authority in computer readable form.
- The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- the description, pages:
- the claims, Nos.:
- the drawings, sheets:

5.  This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

*(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)*

6. Additional observations, if necessary:

**Re item V**

D1: WO 93/03714 A (UPJOHN CO) 4 March 1993 (1993-03-04)  
D2: J.L. WILKINSON-BERKA ET.AL.: "ALT-946 AND AMINOQUANIDINE,  
INHIBITORS OF ADVANCED GLYCATION, IMPROVE SEVERE  
NEPHROPATHY IN THE DIABETIC TRANSGENIC (mREN-2) 27 RAT"  
DIABETES, vol. 51, 2002, pages 3283-3289

The present application is directed to compound according to formula (I) and their application as medicament showing serum-glucose-lowering and serum-lipid- lowering activity.

D2 represents the closest prior art and discloses the compound aminoguanidine, which is falling within the scope of claim 1, as well as diabetes control in rats (cf. passages indicated in the ISR).

Thus, the matter of claims 1, 6-11 do not fulfill the requirements of Article 33(2) and (3) PCT.

D2 which represents the closest prior art differs from the subject matter of claims 2-5 in the substituent Z, X, Y and the integer n. That the special substitution pattern defined in claims 2-5 would retain its serum-glucose-lowering and serum-lipid- lowering activity is also not deducible for the skilled person in the art from D2.

Thus, the matter of claims 2-5 fulfill the requirements of Article 33(2) and (3) PCT.
